**COMMERCIAL APPLICATION FOR WATER SERVICE**

Re: Water Availability Approval for \_\_\_\_\_

Dear \_\_\_\_\_,

This will acknowledge receipt of your request for availability of water for the above address filed on \_\_\_\_\_.

New residents should notify the Authority two weeks prior to needing the water turned on in order to avoid any delays in service. Water Service will not be activated until all past due bills are paid and the Authority receives the notarized signature of the Owner on the “Application for Water Service” form which can be obtained at the Authority’s office or may be downloaded from [www.waterauthorityofgreatnecknorth.com](http://www.waterauthorityofgreatnecknorth.com). Please bring the Application for Water Service in to the Authority’s office. You will need to sign the form in person and will be required to show a government issued I.D. (e.g.: Driver’s License).

The Water Authority of Great Neck North is operating under a New York State mandated restriction on groundwater pumpage. Our ability to service new consumers and to continue serving present consumers will depend on the effectiveness of the Authority’s Water Conservation Program and the cooperation of all Authority consumers.

This approval is given to the owners, for water use at the aforementioned premises and is not transferable. If the premises change tenants/ownership in the future, the new tenant/owners must register with the Water Authority of Great Neck North, 50 Watermill Lane, Great Neck. A new application will be required and subject to a new deposit at that time.

All plumbing water supply fixtures installed on the premises shall comply with or use less water than contained in the requirements of the New York State Plumbing Code, Building Construction, Article 9, Plumbing Requirements, Part 900, Required Plumbing Facilities; and New York State Environmental Conservation Law 15-0314, Powers and Responsibilities With Respect to Certain Plumbing Fixtures, latest amendment thereto. The owner and contractor must utilize conservation fixtures wherever possible to help conserve water.

Per your request, the service described below is approved. Regarding the backflow prevention devices, the approved backflow prevention device must be installed in accordance with standard Water Authority requirements and drawings. Information, standard drawings and appropriate forms are available at our office.

- Irrigation system or swimming pool approvals are subject to separate application and deposits.
- Water will not be used for air conditioning or for cooling purposes.
- A complete copy of the Authority’s Rules & Regulations and Water Conservation Plan can be found on our website: [www.waterauthorityofgreatnecknorth.com](http://www.waterauthorityofgreatnecknorth.com)
- All customers are required to notify the Authority as soon as possible to receive a final bill to avoid charges accumulating after service is no longer required.
